<b>Examination:</b>	F321 – 1 hour written exam; 30% of AS grade F322 – 1 hour 45 minute exam; 50% of AS grade
<b>Is this the right course for me?</b>	Chemistry is essential for Medicine, Dentistry, Veterinary Science, Pharmacy, Forensic Science, Biomedical Sciences and Chemistry degrees. Chemistry involves all aspects of science including marrying practical, mathematical and written aspects of science into one exciting and demanding course. Chemistry provides a means for students to develop intellectual skills alongside manipulative, observational, evaluative and general problem-solving skills. It is a preferred qualification for many courses and is even advantageous for such applications as Law, Economics and Accounting. Chemistry is a very challenging course that further enhances all of the skills gathered during previous GCSE studies.
